

# EMPOWERING WATER WARRIORS

with WaterApp

## Borewell Operator for Tanker Company in Pune

### ISSUES FACED

- No way to know water availability of bore well.
- **Recoup rate is unknown.**
- No visibility into how much water is being pumped and how much is available.
- Unable to plan operations around water extraction.
- Risk of damaging the pump (**dry run**).
- **High pumping costs.**
- No way to monitor bore well operations remotely.

### HOW DID WATERAPP HELP?

- **Full visibility** of water level data, historical, seasonal data and recoup rates.
- Recoup rates help to optimize groundwater extraction.
- Ability to **plan operations in advance** based on water availability.
- Pumping rate indicates if the pump is working efficiently.
- No risk of a dry run.
- Owner can **keep an eye on borewell operation** from anywhere.
