

EMPOWERING WATER WARRIORS

with WaterApp

Residential Society (2 Towers, 60 Flats) in Pune

WATER CONFIGURATION

OVERHEAD - 6

- Drinking (2)
- Utilities (2)
- Fire (2)

UNDERGROUND - 3

- Drinking
- Utilities
- Fire

ISSUES FACED

- Tank and pump operation is known to only one staff member.
- They face water trouble every time he takes time off.
- Daily tank overflows cause lot of **water wastage**.
- When they do not receive enough water from the municipality, there is **no clear data** for decisions such as how many tankers to order and when to order them.

HOW DID WATERAPP HELP?

- Configuration of all tanks is available on everyone's phone.
- See how much water is available at any time.
- Receive **critical alerts** such as water level LOW or FULL to take **timely action**.
- Past and present data help **tanker ordering and paying** decisions.
- WaterApp is simple enough for other staff to use in the absence of the particular member.
- The Management Committee is relieved that they are **no longer dependent on anyone**.
