

EMPOWERING WATER WARRIORS

with WaterApp

Single Residential Building Pune

WATER CONFIGURATION

OVERHEAD - 2

- Drinking
- Utilities & Fire

UNDERGROUND - 1

ISSUES FACED

- They don't have an automatic pumping system and all operations are managed manually.
- **Water pumping** schedule is **irregular** which results in
 - Taps running dry all of a sudden
 - **Frequent Overflows** on terrace resulting in **leakages**
- In summers, there is no way of knowing if they need to order tankers, how many and when.

HOW DID WATERAPP HELP?

- **Cost Savings:** Current automatic pumping systems are expensive and unreliable.
- **No more water surprises** and overflows!
- WaterApp was installed on their security guard's phone. It has freed up his time as he does not have to wait next to the tank.
- Ceiling **leakages are under control**
- Tanker ordering and paying decisions are very easy to make.
